

Kony-2.5.88

Fix:

- Android:

We have added location setting

We have added 4 new parameter in inbox item

1. Expanded Image
2. Expanded Text
3. Action Url
4. Action Type

Inside function handleInboxMessage(p) of {
you will get these parameter

```
kony.print("actionType: " + applInboxVal.actionType);  
kony.print("actionUrl: " + applInboxVal.actionUrl);  
kony.print("expandedDescription: " + applInboxVal.expandedDescription);  
kony.print("expandedImage: " + applInboxVal.expandedImage);
```

build.gradle:

implementation 'appice.io.android:sdk:2.5.88'

Wrapper link:

https://webcdn.appice.io/sdk/libkonywrapper_2.5.88.zip

Please update the wrapper file with the above linked file.

AppInboxMessage.js file

<https://webcdn.appice.io/sdk/AppInboxMessage.js>

```
function locationSetting() {  
    // Step 1: Define permission options  
    var options = {isAccessModeAlways: true};  
  
    // Step 2: Check if location permission is granted  
    var result = kony.application.checkPermission  
    (kony.os.RESOURCE_LOCATION, options);  
  
    if (result.status == kony.application.PERMISSION_GRANTED) {
```

```

// Step 3: Define parameters for location settings
var params = {
  requestModifyLocationSettings: true,
  accuracyMode          : constants.ACCURACY_BALANCED_POWER,

  // Callback function on success
  onSuccess: function() {
    kony.print
    ("Location settings are correct. You can now access the location.");

  },

  // Callback function on failure (e.g., user denies modifying settings)
  onFailure: function(errorCode) {
    if (errorCode == kony.location.SETTINGS_MODIFICATION_REQUEST_DENIED) {
      kony.print("Location settings modification denied by the user.");
    } else {
      kony.print
      ("Failed to modify location settings with errorCode: " + errorCode);
    }
  }
};

checkLocationSettings(PRIORITY.BALANCED_POWER_ACCURACY,
  params, false, function(success){
    kony.print("Appice: location setting "+success)
  }, function(error){
    kony.print("Appice: location setting error "+error)
  });
} else if (result.status == kony.application.PERMISSION_DENIED) {
  // Handle case when location permission is denied
  kony.print("Location permission denied.");

  var paramsDenied = {
    requestModifyLocationSettings: true,
    accuracyMode          : constants.ACCURACY_BALANCED_POWER,

    // Callback function on success
    onSuccess: function() {
      kony.print
      ("Location settings are correct. You can now access the location.");

    },

    // Callback function on failure (e.g., user denies modifying settings)
    onFailure: function(errorCode) {
      if (errorCode == kony.location.SETTINGS_MODIFICATION_REQUEST_DENIED) {
        kony.print("Location settings modification denied by the user.");
      } else {
        kony.print
        ("Failed to modify location settings with errorCode: " + errorCode);
      }
    }
  };
};

```

```

// Step 5: Optionally, request permission
//(can be implemented based on app logic)
kony.application.requestPermission(
    kony.os.RESOURCE_LOCATION,
    function(status) {
        if (status == kony.application.PERMISSION_GRANTED) {
            kony.print("location granted")
        } else {

            checkLocationSettings(PRIORITY.BALANCED_POWER_ACCURACY,
                paramsDenied, false, function(success){
                    kony.print("Appice: location setting "+success)
                }, function(error){
                    kony.print("Appice: location setting error "+error)
                });
            kony.print("Location permission denied again.");
        }
    }
);
}
}

```
